

Annual report of Hosta's activities 2025

Forest school Hosta, with the same zeal as before, also in 2025 strived to spread the following knowledge and practices:

- restoring understanding of the dignity of man as the highest conscious being, who has a responsibility to the planet and nature
- spreading knowledge of biology as a divinity that does not need mechanics and chemistry to perfect itself
- spreading knowledge and practices of natural upbringing and education, which includes nature in all human activities
- spreading consciousness that treats nature as sacred, which perceives human touch
- spreading the mentality of cooperation with nature as a sentient being, which in its works reflects the awareness of the symbiosis of all forms of Life

Hosta forest school operated on a smaller scale in 2025. Two activities continue, public education about the above-mentioned goals through regular posts on the Hosta blog and the Hostarka podcast, and the project to purchase a plot of land for the Hosta activity "A Hectare of Abundance".

Part of the Hosta curriculum and active practice are:

- the law of Life as a starting point for the formation of human Understanding,
- Natural/Common law as a guideline for human relationship to oneself and other forms of Life,
- knowledge about spiritual science and technology and, increasing compliance with Natural Law,
- knowledge about man as the highest technology of Natural Intelligence, which has no limits on self-realization,
- knowledge about the light origin of creation and human creative power,
- emphasis on self-expression through integrity, skill, virtue, mastery..., through music, poetry, design, production and cultivation of inspirations in harmony with Life, and the necessity of their manifestation in the world,
- other newly emerging emphases, knowledge and practices that will partially or completely purify Life-harmful teachings and practices...

Hektar of Abundance

In 2025, a member of Hosta launched the charitable project Hektar of Abundance with the aim of purchasing land and real estate, which will serve as a center for the realization of new directions of human personal and social development in the aforementioned directions for the area of Slovenia and beyond. For this purpose, the member was on a motorcycle trip along the Silk Road and after returning, she is visiting places around Slovenia with a travelogue lecture and spreading the Hosta message. Fundraising is done through direct donations and the purchase of the Phoenix Rising Empowerment Manual, which is now in its 4th reprint. The project is open and alive.

Improvements

Hosta continues to be connected and growing with the global movement of Spiritual Science, which serves humanity and the Earth by realizing:

- natural law,
- self-ownership,
- interest in self-enlightenment,
- breakthrough natural technology and
- service work.

Common Law is the understanding and observance of the Natural Laws of Life. Self-ownership is the mastery of one's own energy and the only possibility of realizing Natural Law.

Interest in self-enlightenment is the realization that progressing along the path of Light is the only evolution available to us and our most personal mission.

Breakthrough Natural Technology Human Wholeness is the highest form of Natural Technology! It is capable of everything that a thought connected to Source is capable of imagining.

Service work Service to fellow human beings, nature and the Whole is the vision in Love of an awakened who, without the hope of reward or profit, realizes the Law of Life, values and nurtures Its biological nature and realizes all-inclusive inspirations.
